

MIBAIO

Smart Homes

MIBAIO

One for All

The New SMART

Welcome to MIBAiO

We are an electrical automation product startup based on Internet of Things.

We transform your home and workspace by upgrading the appliances and making them smart MIBAiO gadgets

MIBAIO 4S

World's first and only device that can communicate via WiFi, Bluetooth, and manual input all at the same time.

Available in 4 Colour Options

Personalise your home with what goes best

What's More?

Connect upto 4 appliances at once

Our Product

Secure. Reliable.

Security

Our IoT cloud servers are TLS and SSL secured to provide 360° security to your smart home

MIBAiO regards security of your home one of its top priorities and we maintain a vigilant stance against intruders by keeping our security systems up to date.

Surge Proof

MIBAiO 4S is carefully engineered to withstand electrical power fluctuations

MIBAiO comes with a Transient voltage surge suppressor (TVSS) to protect your electrical appliances from voltage spikes in alternating current (AC) circuits.

At the touch
of your
fingers

Multi Mode Control

Our system provides versatile control over your smart home by providing selectable multi-mode controls

In addition to the classic manual control feature, MIBAiO enables you to remote control your smart home through

Internet • Bluetooth • Voice • NFC

Voice Control

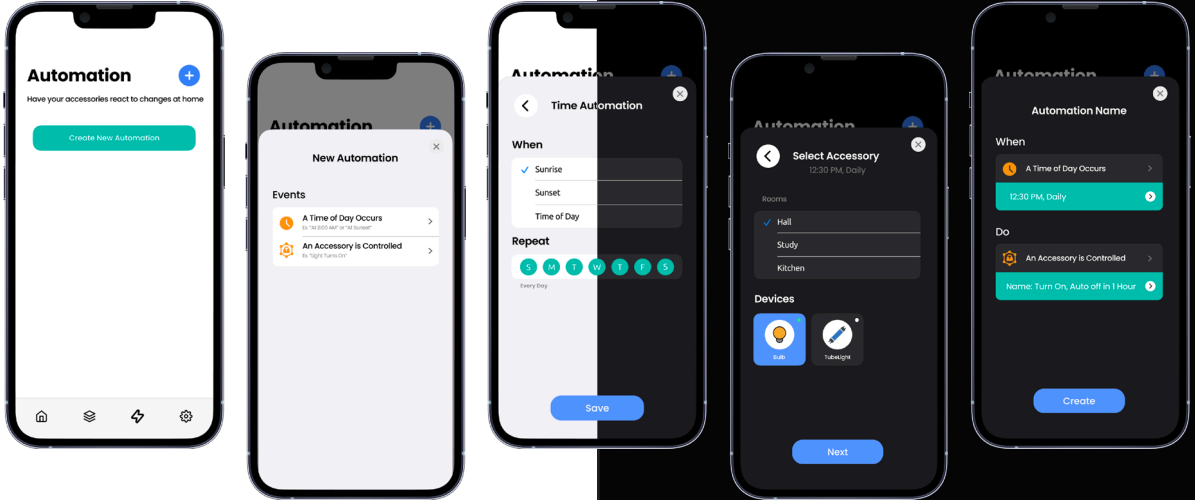

Hands-Free Control of your electrical appliances using voice from anywhere in the world using Google Voice Assistant Alexa supported

Forgot to switch off the fan of your room before going out? No worries! Get the best home automation experience at MIBAiO which provides a truly hands-free control of your home appliances from anywhere

"Hey Siri"
"Ok Google"
"Alexa"

AUTOMATE

Set schedules, run
scenes and automate
your day to day
routines

Filling in the
void of automation
in your
home

Vedant Mane, Founder

The Internet has come to be an essential part of our day to day life, without which we are sometimes vulnerable.

The fast boom of technology influences human beings to make use of smartphones for remotely monitoring and controlling their home. A wise man once said "Automation technology was developed to save time and energy, reduce human effort / labour and add comfort in human life."

We facilitate the existing electrical appliances to be remotely controlled, monitored and accessed using a smartphone application and even your voice!

Our mission is to revolutionize the smart home ecosystem in India and make this affordable luxury available in every Indian household.

**Pushing limits for
your luxuries**
